Tracker: SBML Specifications

This is the public issue reporting system for the SBML specification. Everyone in the SBML community is invited to report issues (such as typographical errors, lack of clarity, logical errors, missing information, etc.) using this system for any of the SBML specifications.

[Click here to report a new issue.](#)

Reported issues are reviewed and evaluated by the SBML Editors and acted upon, and actions taken are logged with the reported issue in this system. Once actions on a given issue are concluded, the issue is marked as "closed" in this system, but it is never deleted and its record can always be accessed.
